FlowMaster Industrial Centrifugal Pump Series

Model: FM-5000 (Asset: Pump P-101) **Manufacturer:** FlowMaster Heavy Industries

Section 4: Maintenance

The FM-5000 is equipped with high-speed ceramic bearings. **CRITICAL:** Bearings MUST be lubricated every 90 days (quarterly) with synthetic polyurea grease (SynthoLube-X9 or equivalent). Mixing grease types will cause sludge formation.

Section 5: Troubleshooting

- **High Temperature / High Vibration:** Typically indicates bearing starvation or misalignment.
- **Low Discharge Pressure:** Indicates impeller wear or cavitation.
